

Transform Your Outdoor Space

VEKAdeck® is the perfect way to add value and beauty to any home. An advanced cellular processed PVC deck board, VEKAdeck is ideal for homeowners, architects and builders.

VEKAdeck's long life, durability and low maintenance, along with a high return on investment, make it a superior board for residential and commercial deck applications.

An environmentally friendly alternative to lumber and composite deck boards, VEKAdeck is approved for ground contact without absorbing moisture or rotting.

FEATURES & BENEFITS

Environmentally Responsible

Lightweight

Insect Resistant

Easy to Install

Low Maintenance

Easy to Clean

Slip Resistant

Easily Fastened

Fire Resistant

► Color Retention

VEKAdeck is fade resistant under normal weathering conditions.

► Fire Resistant

PVC has a high self ignition temperature (over 600°F), a slow burn rate and will self extinguish if the flame is removed

► Splinter Proof

PVC compound will not crack, split, splinter, rot, flake or peel.

► Impact Resistant

Meets or exceeds industry ASTM standards for breaks and punctures.

► Water Resistant

Ideal for high humidity and marine areas.

► Dimensionally Stable

Low expansion and contraction rate allows for end-to-end butt joints. VEKAdeck is not intended to be a structural material.

VEKADK-TRI-0123

VEKAdeck® & Fascia, A Perfect Combination

Features:

VEKAdeck, VEKAdeck Groove and matching fascia are designed to blend seamlessly, made with a proven formula that has been around for over 20 years. Install VEKAdeck on curves and semi-circles along with fascia trim for a custom design.

- VEKAdeck available in a 5.5" width and 1" thickness
- Fascia available in a true 12" width and 7/16" thickness
- Natural-looking wood grain pattern
- Install traditionally, or with recommended fastener or screw systems
- Durability and performance assured with limited lifetime warranty; visit vekaolp.com for details

Easy to Care For

PVC is non-absorbent, stain resistant and does not require painting, staining, UV treatment or water sealing. A periodic cleaning with ordinary non-abrasive household cleaners and a stiff bristle brush will keep your VEKAdeck installation the perfect combination of beauty and durability. Remove standing water to prevent dirt buildup. A seasonal pressure wash is recommended as a best practice.

Recycled & Recyclable

VEKA reclaims in-house startup material and run-off. The material is reused, after being pulverized into PVC powder, in both VEKAdeck and VEKA DualEdge profiles for fence and rail shapes.

Performance additives in the outer co-extruded surface of VEKAdeck aid in impact resistance, heat reflectance and color retention.

*Special order colors, please consult your sales account executive for details.

100% Cellular PVC Core

VEKAdeck is not a composite and does not contain organic material.

GROOVE

A VEKAdeck Product

Developed in response to customer demand, VEKAdeck Groove is compatible with most hidden deck fasteners designed for slotted PVC deck boards.

- Faster installation than conventional deck boards
- Groove is available in Khaki and our Signature colors

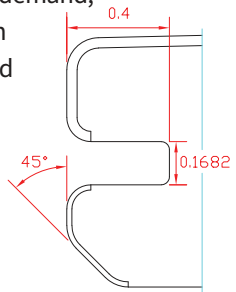

Photo shows an installation using a hidden fastener system. Ask your VEKAdeck representative about recommended hidden fastener systems.

Installs Easily & Quickly

Lightweight and easy to handle, VEKAdeck installs traditionally, like wood, with deck screws. VEKAdeck and matching fascia requires no pre-drilling, can be cut, sawed, screwed. Approved screws self-counter-sink into VEKAdeck and will not cause the board to mushroom or split.

For a beautiful flush finish, you can install VEKAdeck easily using most hidden fastening systems available.
