

- Advanced color technology for longer-lasting good looks
- Extreme impact resistance rivals strength of hardwoods
- Engineered for strength with exclusive Korelite™ technology
- Can be heated and bent without compromising
- Proprietary wood grain embossing technology
- Low moisture absorption
- Stays up to 30% cooler than other competing PVC brands
- Limited transferable Lifetime Performance Warranty

Innovation at work genius at play.

Clubhouse® Decking has no wood or wood fillers to warp, rot or break down. But it does have a proprietary formulation that produces a super-dense structure that is impervious to water and provides dramatic strength and protection against impact.

In our single-extrusion process, our PVC core and proprietary blend capstock become one. Both the cap and the core are made of like material, creating a stronger chemical bond during extrusion for incredible results and superior strength.

In addition, the dense cell structure allows Clubhouse decking to be heated and bent without bubbling up and compromising the wood grain texture that makes Clubhouse decking so eye-catching. In other words, with Clubhouse decking, you get beautiful, unique shapes that real wood just can't offer.

World-Class Materials Science. Performance Defined.

Leveraging world-class, in-house materials, tooling, and manufacturing capabilities, Clubhouse® Decking provides advanced color technology for extreme protection against extreme conditions.

Clubhouse also features our exclusive, proprietary Korelite™ technology for a dense cell structure and superior strength underfoot. Along with the 4-sided cap high-performance capstock, it provides unprecedented protection to the boards and your deck.

Clubhouse Premium PVC Decking

Incredible choice comes with incredible beauty.

Our Hardwood color collection was designed with a variation in color and patterns to allow for the most realistic replication of true hardwood decking. With six colors to choose from, the distinctive, variegated grains of our hardwood colors give you a truly unique, natural wood feel that's all your own.

The Earthtone color collection offers four stylish solid shades that offer the look of painted wood without the need for maintenance... a light cleaning is all that is needed.

Clubhouse in Ipe and Walnut

Ultra

Show your smarts in a deck that will outperform and outlast without losing its beautiful, natural good looks. And with a Class A Flame Spread Index, you'll have peace of mind knowing that your Clubhouse Ultra deck is protecting both you and your family as well as the planet.

Our shared commitment.

Our commitment to sustainability and the environment shows in everything we do and every deck board we make. We do not contribute to deforestation, we create virtually no waste in the manufacturing of our decking, we harness the power of solar energy for our manufacturing processes, and we protect the Earth's waterways with a closed-loop filtration system that reduces freshwater consumption and energy use.

-  Divert as much as 7,223,000 million pounds of waste from landfills each year
-  99.997% land-fill free - virtually no waste
-  Closed-loop water filtration system
-  No organic wood in cap or core
-  Does not contribute to deforestation
-  Use solar energy in manufacturing
-  Recycle 100% of internal scrap
