Exclusive Powder Coating Process

DSI is an industry leader in Powder Coated Aluminum Products. State-of-the-art technology is used to provide a high-quality and durable finish that is more resistant to the effects of impacts, chemicals, ultra-violet light, moisture, and extreme weather conditions.

The process begins with a system certified by the Powder Coating Institute (PCI) and continues with the American Architectural Manufacturers Association (AAMA) / Fenestration and Glazing Industry Alliance (FGIA) verifying our Powder Coating. These stringent processes provide homeowners with peace of mind in their investment.

Our Aluminum Lifetime Limited Warranty includes a Fade Warranty as well as a Salt and Abrasive Environments Warranty providing one of the best warranties in the industry.

1 The raw premium-grade aluminum is inspected to be free of blemishes and is not exposed to the outdoor elements.

2 The product enters a heated acidic cleaning stage to remove extrusion debris and fabrication oils.

3-6 **Clean:** City water rinse
Cleaner: Recycling reverse osmosis water rinse
Cleanest: Pure reverse osmosis water rinse
Sealer: Dried-in-place aluminum sealer

7-8 A 200 MPH air blast removes water drops from the pre-treated aluminum. A convection oven completes the dry-off process.

9 Powder is applied with 18 automated and 2 manual spray guns. Compressed process air is dried to -35°F Dew Point for superior adhesion.

10 The powder coating is then bonded and adhered to the aluminum substrate in a 400 degree cure stage.

Check out DSI's newest gem: the Westbury Sorrento Mesh Railing. Kick your outdoor setup up a notch with a slick, modern vibe, and tough build. Crafted with top of the line materials and precision engineering, Sorrento Mesh Railing nails both style and sturdiness. Say hello to safety without sacrificing style – your deck or patio is about to get a major upgrade!

SORRENTO (C60)

Product Details
